Marlow, Bucks, UK

## SKILLS

HTML, CSS, Javascript

React, Express

Node, SQL

Git, GitHub, Photoshop

## EDUCATION

**Treehouse**
**Full Stack Javascript TechDegree**

Aug '23 - Jan '24

**Arts University College Bournemouth**
**BA(hons) Commercial Photography**

2008 - 2011

**Buckinghamshire New University**
**BTEC Art Foundation**

2007 - 2008

## PROFILE

Junior Front End Developer with a focus on building user-friendly and engaging websites/applications and a commitment to ongoing learning. A recent graduate of a comprehensive full-stack web development course, I have dedicated the past year developing my skills through self-directed learning. While my professional background lies in photography, I believe I can bring a unique perspective to a web development role.

## PROJECTS

**Fairtown Pizza School**                    **Link to site**

Homepage for a fictional pizza school. Users can find information on the school, it's teachers, courses and contact details along with a form to book a place.
I wanted to build a site from scratch using React that was visually impactful, representing the fun and creativity of the cookery school.
Some features I practiced and learnt along the way were modal windows, form validation and responsive design.

**Where Can I Watch....?**                    **Link to site**

A site for users to find where they can stream their favourite movies. Users enter
a title and their country and an API returns a list of movies, once one is selected a modal window pops up with a list of links to streaming services available in their country. Two separate APIs were needed to get the information I needed and it was a great learning experience to use them both in tandem.

**Course Directory**                    **Link to site**

This project was part of a full stack Javascript course I completed with Treehouse. The site is a course directory where users can view courses or sign up and log in to add, update and delete courses of their own. The front end was built using React and the back end was built using a REST API with SQL.
I learnt a lot about the full stack process, including authentication, validation, error handling and how to connect the front and back end.

## WORK EXPERIENCE

2011-Present

**Architectural and Interiors Photographer**

Freelance and Employed

My experience in architectural photography for over a decade has equipped me with great attention to detail and an eye for design aesthetics. Through working with a diverse clientele, I have developed strong communication and interpersonal skills and an aptitude for creative problem-solving, that I have found valuable over the years. I am confident that these skills and experiences are transferable to a web development role, allowing me to contribute effectively and offer fresh insights.
